<b>Tram provision</b>	Adtranz
<b>Operations &amp; Maintenance</b>	Transdev/NCT

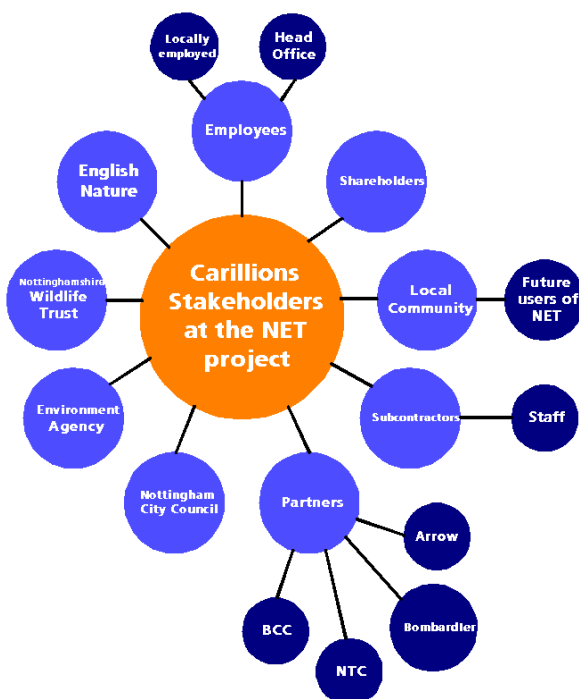

### Social Initiatives

#### Community liaison

Supporting further & higher education

#### Training

#### Stakeholder dialogue

### **Social.**

The public interface is considered at every level of our organisation including planning, design, construction and supply chain.

### **Communication.**

Information regarding our environmental performance is distributed to Carillion staff and subcontractors via e-mail, notice boards in offices and canteens, through internal reports and press releases in collaboration with Nottingham City Council.

### **Community Liaison.**

Carillion Capital Projects and Nottingham City Council are committed to maintain and increase awareness among the local businesses and the community. This is achieved through the production of newsletters, leaflets, a website ([www.nottinghamexpresstransit.com](http://www.nottinghamexpresstransit.com)) and a tram hotline. Public meetings are held at regular intervals throughout the year with assistance where required from a sign language interpreter.

### **Supporting / Encouraging Further and Higher Education.**

7 students from different universities including Nottingham University and Nottingham Trent University have joined NET during summer or work placements.

Carillion and Nottingham University have also recently concluded a pilot dam building project. The scheme aimed to encourage students to enter the construction industry by involving the students in the excitement and challenges of managing a construction project. 30 students took part in the exercise.

### **Training.**

Staff and operatives are trained through a Safety and Environmental site induction prior to commencing work on the project, as well as monthly Safety and Environmental briefings and tool box talks on social and environmental issues. Carillion staff also attend external training as identified in their Personal Development Review.

### **Stakeholder Dialogue.**

Carillion at the NET project have gone through a process of identifying their stakeholders and ensuring they are kept up to date with the activities on site.
