

Environmental Tool Box Talks -Pg1 Environmental Policy

Carillion Infrastructure Services and Capital Projects have adopted the Environmental Policy Statement below which should be displayed on all site notice boards. This is an important document which outlines the companies commitment to reducing our impact on the environment and continually improving standards.

Using current Best Practice and instigating and developing our own methods of Best Practice.

Carillion Infrastructure Services & Capital Projects Environmental Policy Statement

Carillion Infrastructure Services and Capital Projects is committed to developing sustainable solutions and recognises its responsibility for the impact of its operations on local communities and the natural environment.

Carillion's approach is based on achieving and reporting continuous improvement in environmental performance. The implementation of this statement will be reflected in our activities.

Carillion is committed to:

- Meeting all requirements, regulations and standards of the country of operation, and monitoring to ensure compliance.
- Preventing pollution and monitoring and reduction of any adverse impacts such as the effects of noise, dust and nuisance on the environment and communities as far as is reasonably practicable.
- Demonstrating efficient use of energy, water and raw materials through the development of performance indicators and taking appropriate opportunities to minimise waste and to re-use and recycle.
- Working to improve the standards of the business sectors in which the company operates, enhancing environmental awareness and commitment amongst our employees through structured training, and encouraging the adoption of sound environmental and social principles amongst customers, subcontractors and suppliers alike.
- Engaging in stakeholder dialogue where possible to identify innovative solutions and appropriate alternatives to environmental challenge
- Providing relevant training to ensure all employees are competent to carry out their work.
- Seeking to influence the environmental impact of the constructed product through enhancement of design specification and the adoption of sustainable construction techniques.
- Reporting the key environmental impacts of our operations, the improvements achieved and targets for the future.

G Bryden
Managing Director
Infrastructure Services

MC Palmer
Managing Director
Capital Projects

Complying with legislation through the use of the company legislation register, which as well as other environmental information is available via the intranet.

Undertake environmental awareness training on site, encourage subcontractors and suppliers to attend the monthly Safety and Environmental briefings for their own information.

Monitoring energy, water and raw material usage on site. Implementing schemes to reduce, reuse and recycle.

Sustainability Bruntland 1987 - The ability to meet the needs of the present, without compromising the ability of future generations to meet their own needs.

Communicate with interested parties and through this liaison produce leading solutions and alternatives to environmental challenges.

Developing and update the Aspects Registers, and use this information to improve the site plan. Set appropriate targets to reduce the significance of identified impacts.

Remember what you do and how you do it makes a difference. Your actions and personal decisions can have either a positive or negative effect on our environment. Do the right thing look after your environment.

What can you do to reduce the impact that you have on the environment?

More information about the environment can be found on the company intranet site, or through your site environmental co-ordinator and the Environment Advisor.
